Two Sets of Rear Input Jacks - One Set of Composite Inputs w/ S-Video Plus Another Set of Inputs That Can Be Used for Either a Composite or Component Connection

Sound Logic™

Benefits

Reduces peripheral screen reflections & glare by over 60% compared to standard tubes. Offers a wider effective viewing area from any angle. Detail clarity adds realism.

Enhanced audio package includes ultra low-distortion pre-amp w/ on-screen bass, treble & balance controls; 5w/chan stereo amplification & matrix expansion option.

Improves video quality by separating the signal into 3 video connectors. Provides more vibrant, sharper images compared to single video inputs.

Separates black-and-white detail from color information to virtually eliminate edge crawls and rainbow effects while enhancing picture resolution.

Allows predetermined viewing time (up to 16 hours per day) to be set in 30-minute increments with a password. Allows daily setting over 7 days. (Also works with inputs.)

Simplifies connecting components such as a home theatre system, digital camera, DVD, game, etc. Stereo audio outputs offer selectable fixed or variable output.

Provides consistent volume levels throughout programming & channel changes. Eliminates annoying "blast" of sound during some commercial breaks.
